FTS-600 (Floor-to-Stand Human Lift)

- Introducing the Floor-to-Stand Human Lift which has been developed for professional healthcare to eliminate manual lifting in most daily patient handling situations. The FTS-600 lifts and transfers mobility challenged individuals from a wheelchair, bed, commode, or the floor into a sitting or standing position per the needs of the individual patient.
- The FTS-600 also provides a standing-lift function for mobility limited patients requiring assistance onto an exam or radiology table or other surface otherwise inaccessible.

Summary of Features

- Lifts from floor to standing in about 90 seconds, depending upon load
- Beveled seat-front for easy slide-on access
- Wired remote for convenient operation
- Swinging/Removable Rise Assist Handles for secure easy transfers
- Small footprint to allow easy turning radius in tight spaces
- Powder coated for easy cleaning
- Two Lithium-Ion batteries for continuous operation and a charger
- Status check switch in each battery that shows its current charge level
- Automated charger to leave the second battery on until time to swap
